First Semester vs. Cumulative GPA

Standardized Test Score vs. Cumulative GPA

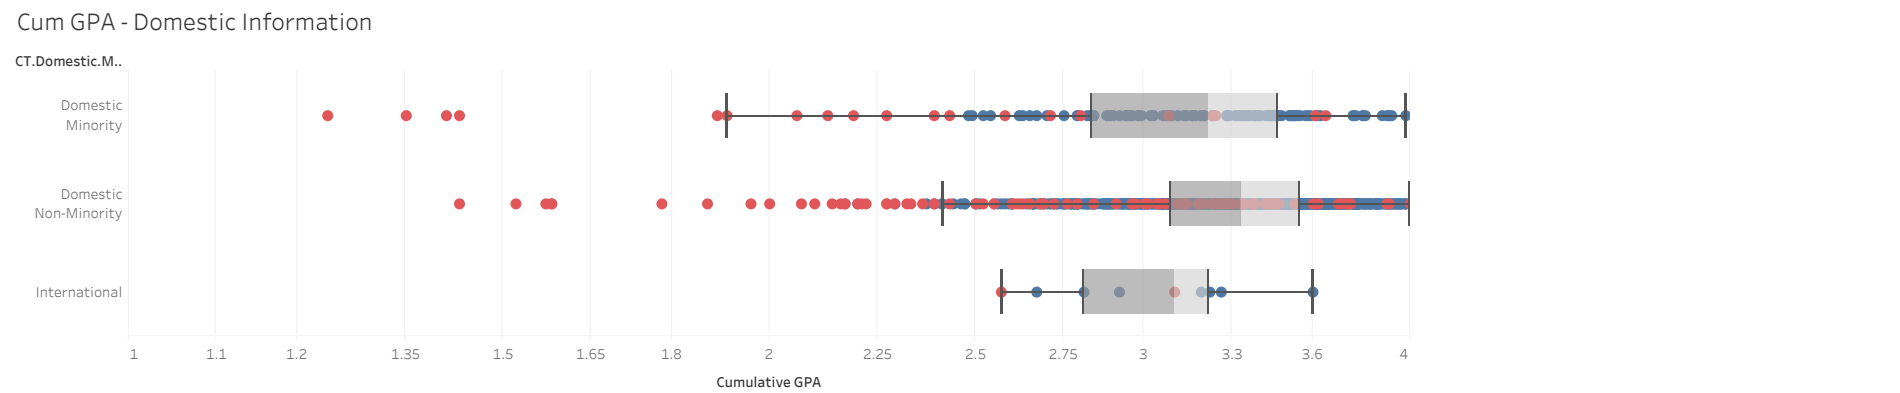

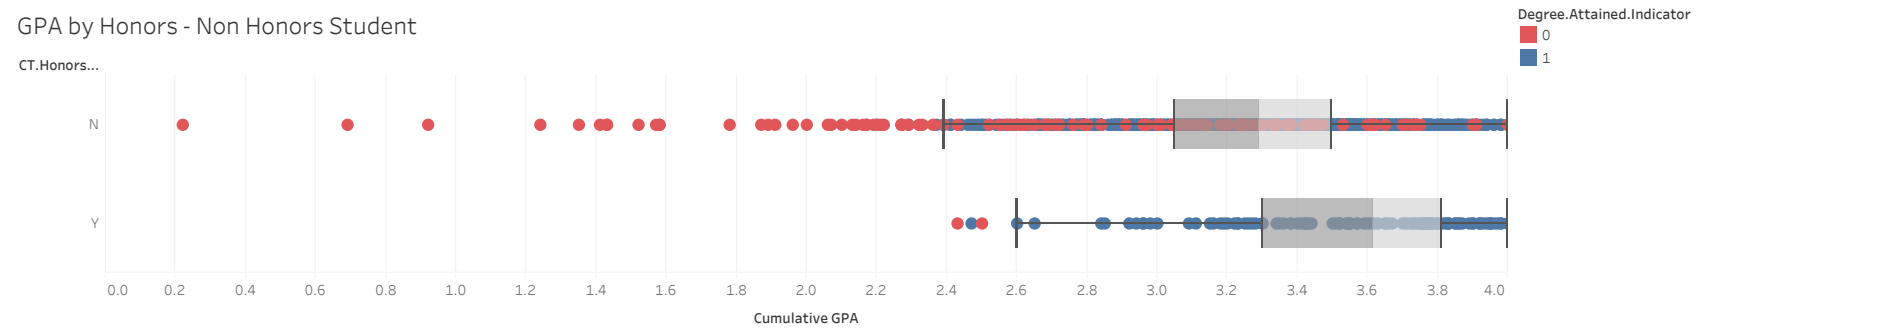

Overall, it is clear that students that had good first semester GPAs and standardized test scores (SAT or ACT) tend to do end their college with decent GPAs.

However, there seems to be no pattern across whether they earned their degrees or not based on their standardized test scores or GPAs of first semester. In other words, some students started off really great regarding these two statistics still ended up not earning their degrees.
